California Cactus Nursery

ALBERT KREJCI, HORTICULTURIST

VAN NUYS, CALIFORNIA

14427 Kittridge Street

● **PLEASE NOTE:** The leading idea in compiling this list was: We would like to be a **STEADY AND RELIABLE SOURCE OF SUPPLY** to all those who are using these interesting plants for decorative purposes in quantity. This price list cancels all previous issues.

All prices F. O. B. Van Nuys, California. For parcel post shipments add 15% if West of the Mississippi River, 20% if East of the Mississippi. Otherwise parcels will be shipped by express with charges collect.

Whenever plants are not on hand, your money will be credited to you or returned as per instructions. Unless instructed to do so, we will not substitute.

TERMS: Cash with the order. On orders of \$5.00 or over we will allow a 5% discount.

What We Have in Quantity

COLLECTION A:

We had such a success with small and dwarf Opuntias that we had to extend this department. This year we are offering an exceptionally fine assortment of healthy, well rooted plants. Lath house grown, clean plants of every shape, form and color priced per 100, \$1.50.

COLLECTION B:

Cacti, other than Opuntias—These contain upright growing types with some globular and cylindrical forms. Hylocereus, chamaecereus, nyctocereus, selenicereus, Harrisia, trichocereus, echinopsis, etc. Small to medium size plants, \$1.75 per 100.

Cacti in these previous collections are for decorative purposes, to be used in miniature gardens, ornamental containers, etc., and are not labeled.

COLLECTION C:

We are again offering a fine stock of grafted cacti. A grafted cactus is not a freak. As a rule they grow better, produce vigorous plants and bloom better than on their own roots. They are sure to attract attention of everyone who is looking for something different. In a collection of one dozen you will possibly get: Rare Wilcoxias, imported Phyllos, dainty Rhipsalis, beautiful heliocerei, popular aporocactus, occasional Mamillaria, Rebutia or Malacocarpus. Price 20c, \$2.00 per dozen.

ASCLEPIADACEAE

What We Have In Quantity

We grow many thousands of these interesting plants every season and every season we are sold out way ahead of time. Our is, without exaggeration, one of the largest commercial collections in California, and from our large selection we have prepared:

COLLECTION D:

Most interesting, altogether different types, 20 varieties, 100 for \$3.00, labeled.

Two species forming low, dense clusters, prolific bloomers, well colored are available in lots of 100. *Stapelia pulchella* (little beauty), \$1.75 per 100. *Stapelia verrucosa*, \$1.50 per 100. *Stapelia variegata* in many attractive forms, \$1.50 per 100.

MESEMBRYANTHEMA

What We Have In Quantity

About ½ acre in our nursery is devoted to Mesembryanthema; from our stock of about 200 varieties we are selecting a relatively small group of plants of distinctly good types. Nearly all varieties offered make good, attractive plants even when not in bloom. When in flower, they must be seen to appreciate the peculiar silky beauty of their colors.

COLLECTION E:

Labeled collection of the best we grow. Pretty flowers, good coloring of the plants and decorative appearance were guiding us to make this selection. Price 20 varieties, \$2.00 per 100; 30 varieties, \$3.00 per 100.

COLLECTION F:

Many of these are well adapted for planting in very small containers. A good, unlabeled mixture at \$1.00 per 100.

Other varieties of exceptional qualities available in quantity:

Cephalophyllum alstonii—large ruby red flowers; without hesitation the most beautiful of all, \$3.00 per 100.

Acrodon bellidiflorus—large daisy-like, brilliant flowers, decorative plants, \$2.50 per 100.

Faucaria tigrina (tiger jaws), \$3.50 per 100.

Cheiridopsis aspera—purple plants with white frosting, rigid leaves, large yellow flowers, \$2.00 per 100.

Cephalophyllum acutum—large lovely pink, \$1.50 per 100.

Some time ago we were offering special collections of outstanding succulents. Color of the foliage, beauty of the flowers, a real oddity of the plants were the factors emphasized in each collection. At this time we are repeating our offer at considerably better prices and a larger selection of plants in each group.

COLLECTION G:

Something bright; every plant highly colored, nothing just plain green included. Many varieties. Assortment of 100, \$3.00.

COLLECTION H:

Something really odd and different. In presenting this collection I could not select better plants if you were present personally in our garden. Assortment of 100, \$5.00.

COLLECTION I:

Character plants. Plants that resemble miniature trees, shrubs, fine trailing plants, etc., 25 for \$1.25.

COLLECTION J:

Very small plants of every description for miniature containers, fillers in table gardens, etc. Excellent mixture for your everyday work when price is what counts and competition is keen. Every plant is a fine, usable little specimen. \$1.00 per 100.

EUPHORBIAS

Due to fluctuation of our stock we are offering here these interesting African succulents in assortment only. If really interested, write for a complete list on hand at the time of inquiry. 20 varieties, all different, labeled, \$3.00.

100 small Euphorbias, mixed, \$5.00.

ALOES, Etc.

100 assorted Aloes, Gasterias, Haworthias, etc., \$3.00.

SHORT GROWING INSTRUCTIONS

Good drainage is always essential. Give plenty of light, but protect your plants from direct burning sunlight in summer time. Don't allow your pots to dry up when the plants are growing. Water sparingly when they are resting or dormant. For planting use a mixture of one-third coarse sand, one-third of fine old screened leaf mold, and one-third of good garden or potting soil. Add traces of lime (old mortar, etc.) and charcoal. With this mixture fill the put up to one inch, more or less; over this mixture put a layer of sand and plant. Water very carefully until your plants get established and show signs of active growth.

For propagation by cutting: Plant your cuttings in clean sand, keep in shade and in case of Crassulas, Asclepiads and Mesembs of more succulent types do not water until your cuttings begin to root.

BUREAU OF PLANT INDUSTRY
Fruit and Vegetable Crops and Diseases

GPO 8-3591

SPECIAL OFFER

Many of our plants are quick sellers when in bloom. If you are interested in handling these, we would gladly put you on our special mailing list and send you from time to time samples and description of plants getting ready to bloom.

Write us, if interested in shrubby Mesembryanthemum seed. Rapid growing, many colors.
